All Rights Reserved

No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1996 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

This journal is printed on acid-free paper.

CONTENTS OF VOLUME 335

Number 1, November 1, 1996

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

- Acidic Fibroblast Growth Factor Enhances Peroxynitrite-Induced Apoptosis in Primary Murine Fibroblasts
Jordan T. Shin, Luis Barbeito, Lee Ann MacMillan-Crow, Joseph S. Beckman, and John A. Thompson 32
- Effects of Caloric Restriction on Expression of Testicular Cytochrome P450 Enzymes Associated with the Metabolic Activation of Carcinogens
John E. Seng, Jay Gandy, Angelo Turturro, Ruth Lipman, Roderick T. Bronson, Andrew Parkinson, Wesely Johnson, Ronald W. Hart, and Julian E. A. Leakey 42
- Protein Radicals in Myoglobin Dimerization and Myoglobin-Catalyzed Styrene Epoxidation
Richard A. Tschirret-Guth and Paul R. Ortiz de Montellano 93
- Baculovirus Expression and Purification of Human and Rat Cytochrome P450 2E1
Wei-qiao Chen, Raimund M. Peter, Susan McArdle, Kenneth E. Thummel, Randall O. Sigle, and Sidney D. Nelson 123
- Mitochondrial ATP Synthase: Fe^{2+} -Catalyzed Fragmentation of the Soluble F_1 -ATPase
Grigory I. Belogradov 131
- Reaction of Ozone with Enzymes of Erythrocyte Membranes
J. B. Mudd, P. J. Dawson, J. R. Adams, J. Wingo, and J. Santrock 145
- Interconversion of the Androstenedione Hydroxylase Specificities of Cytochromes P450 2B4 and 2B5 upon Simultaneous Site-Directed Mutagenesis of Four Key Substrate Recognition Residues
You Qun He, Grazyna D. Szklarz, and James R. Halpert 152
- Expression and Loading of Recombinant Heavy and Light Chain Homopolymers of Rat Liver Ferritin
Jia-Hsin Guo, Majid Abedi, and Steven D. Aust 197
- Identification of CYP4A11 as the Major Lauric Acid ω -Hydroxylase in Human Liver Microsomes
Pnina K. Powell, Imre Wolf, and Jerome M. Lasker 219

BIOPHYSICAL CHEMISTRY AND X-RAY CRYSTALLOGRAPHY

- Urea-Induced Equilibrium Unfolding of Single Tryptophan Mutants of Yeast Phosphoglycerate Kinase: Evidence for a Stable Intermediate
Barbara K. Szpirowska and Maria T. Mas 173

ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

- In Vitro* Phosphorylation of Human Immunodeficiency Virus Type 1 Tat Protein by Protein Kinase C: Evidence for the Phosphorylation of Amino Acid Residue Serine-46
A. M. Holmes 8
- δ -Aminolevulinic Acid-Induced Synaptosomal Ca^{2+} Uptake and Mitochondrial Permeabilization
Carlos A. A. Penatti, Etelvino J. H. Bechara, and Marilene Demasi 53
- S-Glutathiolated Hepatocyte Proteins and Insulin Disulfides as Substrates for Reduction by Glutaredoxin, Thioredoxin, Protein Disulfide Isomerase, and Glutathione
Che-Hun Jung and James A. Thomas 61
- Specificity of Aspartokinase III from *Escherichia coli* and an Examination of Important Catalytic Residues
Yen-Fang Keng and Ronald E. Viola 73
- Comparison of the β -Toxins from *Staphylococcus aureus* and *Staphylococcus intermedius*
Katarzyna Dziewanowska, Vincent M. Edwards, James R. Deringer, Gregory A. Bohach, and Daniel J. Guerra 102
- Potent Inhibition of Human Polyglutamate Synthetase by Suramin
John J. McGuire and William H. Haile 139
- μ -Monothiopyrophosphate as a Substrate for Inorganic Pyrophosphatase and UDP-Glucose Pyrophosphorylase
Eric S. Lightcap and Perry A. Frey 183

GENE EXPRESSION, TRANSCRIPTION, AND TRANSLATION

Isolation of the Promoter for Type I Hexokinase from Rat

Joseph A. White, Wenjing Liu,
and John E. Wilson 161

Tissue-Specific 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin-Inducible Expression of Human UDP-Glucuronosyl-transferase UGT1A6

Peter A. Münzel, Gerhard Bookjans, Gernot Mehner,
Tobias Lehmköster, and Karl Walter Bock 205

GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES

α 1,4-Fucosyltransferase Activity in Human Serum and Saliva

Russell A. DeBose-Boyd,
A. Kwame Nyame, David F. Smith, and Richard D. Cummings 109

LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS

Effects of Fumonisin B₁ and (Hydrolyzed) Fumonisin Backbone AP₁ on Membranes: A Spin-Label Study
Jun-Jie Yin, Mitchell J. Smith, Robert M. Eppley, Annette L. Troy, Samuel W. Page, and James A. Sphon 13

Direct Proof That Phorbol Ester Accelerates the Use of Choline Phosphate for Phosphatidylcholine Synthesis in Intact Cells

Zoltan Kiss 191

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

Positions of Disulfide Bonds in Yam (*Dioscorea japonica*) Acidic Class II (Class IV) Chitinase

Tomohiro Araki, Mayumi Kuramoto, and Takao Torikata 118

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

Spectroscopic Characterization of the Growing Polypeptide Chain of the Barley Chymotrypsin Inhibitor-2

Gonzalo de Prat Gay 1

Identification of the Subunit Loci in the Extracellular Multisubunit Hemoglobin from Annelid *Perinereis aibuhitensis*

Mariko Yamaki, Keiko Matsubara, Akihiro Shibuya, Toshio Gotoh, and Satoshi Ebina 23

Extracellular Matrix-Associated Serine Protease Inhibitors (*M_r* 33,000, 31,000, and 27,000) Are Single-Gene Products with Differential Glycosylation: cDNA Cloning of the 33-kDa Inhibitor Reveals Its Identity to Tissue Factor Pathway Inhibitor-2

C. N. Rao, Prasad Reddy, Yueying Liu, Edel O'Toole,
Dennis Reeder, Donald C. Foster, Walter Kisiel, and David T. Woodley 82

Mutational Analysis of Both Subunits from Rat Mitochondrial Processing Peptidase

Hans-Martin Striebel, Petr Rysavy, Jiri Adamec, Jaroslav Spizek, and Frantisek Kalousek 211

ERRATUM

Volume 330, Number 2 (1996): Tanya Jonassen, B. Noelle Marbois, Lena Kim, Arnold Chin, Yu-Rong Xia, Aldons J. Lusis, and Catherine F. Clarke, "Isolation and Sequencing of the Rat *Coq7* Gene and the Mapping of Mouse *Coq7* to Chromosome 7," pp. 285-289

227

Number 2, November 15, 1996

RESEARCH REPORT

Identification of Nitration Sites on Surfactant Protein A by Tandem Electrospray Mass Spectrometry

Kenneth D. Greis, Sha Zhu, and Sadis Matalon 396

BIOLOGICAL OXIDATIONS AND P450 REACTIONS

The Metabolism of Tyramine by Monoamine Oxidase A/B Causes Oxidative Damage to Mitochondrial DNA

Nils Hauptmann, Joseph Grimsby, Jean C. Shih, and Enrique Cadenas 295

ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

- Insulinotropic Action of Methyl Pyruvate: Secretory, Cationic, and Biosynthetic Aspects
*Willy J. Malaisse, Hassan Jijakli, Sadik Ulusoy, Lynda Cook, Leonard Best, Concepción Viñambres,
 Maria L. Villanueva-Peñacarrillo, Isabel Valverde, and Abdullah Sener* 229
- Insulinotropic Action of Methyl Pyruvate: Enzymatic and Metabolic Aspects
*Hassan Jijakli,
 Abdellatif Bakkali Nadi, Lynda Cook, Leonard Best, Abdullah Sener, and Willy J. Malaisse* 245
- Inhibition of a Src Homology 2 Domain Containing Protein Tyrosine Phosphatase by Vanadate in the
 Primary Culture of Hepatocytes
*Subbiah Pugazhenth, Feridoon Tanha, Bruce Dahl,
 and Ramji L. Khandelwal* 273
- Amino Acid Residue 104 in an α -Class Glutathione S-Transferase Is Essential for the High Selectivity and
 Specificity of the Enzyme for 4-Hydroxynonenal
*Bindu Nanduri, Janet B. Hayden,
 Yogesh C. Awasthi, and Piotr Zimniak* 305
- Role of Cytosolic Serine Hydroxymethyltransferase in One-Carbon Metabolism in *Neurospora crassa*
Soon-Seog Jeong and Verne Schirch 333
- Effects of Cysteine-to-Serine Mutations on Structural and Functional Properties of Prostaglandin Endoper-
 oxide Synthase
Christopher J. Smith and Lawrence J. Marnett 342

GENE EXPRESSION, TRANSCRIPTION, AND TRANSLATION

- Determination of Xanthine Dehydrogenase mRNA by a Reverse Transcription-Coupled Competitive Quanti-
 tative Polymerase Chain Reaction Assay: Regulation in Rat Endothelial Cells by Hypoxia and Hyperoxia
Joseph J. Lanzillo, Feng-Sheng Yu, Joanne Stevens, and Paul M. Hassoun 377
- Inhibition of I κ B- α and I κ B- β Proteolysis by Calpain Inhibitor I Blocks Nitric Oxide Synthesis
Shawn A. Milligan, Michael W. Owens, and Matthew B. Grisham 388

GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES

- Inhibition of the Trehalose-P Synthase of Mycobacteria by Various Antibiotics
Y. T. Pan and Alan D. Elbein 258

LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS

- Effect of Insulin on Fatty Acid Uptake and Esterification in L-Cell Fibroblasts
*Eric J. Murphy, Daniel R. Prows, John R. Jefferson, Sandra Incerpi, Zsolt I. Hertelendy,
 Clayton E. Heyliger, and Friedhelm Schroeder* 267
- Nitric Oxide: A Prostaglandin H Synthase 1 and 2 Reducing Cosubstrate That Does Not Stimulate Cyclooxy-
 genase Activity or Prostaglandin H Synthase Expression in Murine Macrophages
*John F. Curtis,
 Nagi G. Reddy, Ronald P. Mason, B. Kalyanaraman, and Thomas E. Eling* 369

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

- Cloning and Expression of a Rat Kidney Cytosolic Glutamine Transaminase K That Has Strong Sequence
 Homology to Kynurenine Pyruvate Aminotransferase
Dicky G. Abraham and Arthur J. L. Cooper 311
- Characterization of the Import Pathway of the F₁F₀ Subunit of Mitochondrial ATP Synthase into Isolated
 Plant Mitochondria
Patrick Dessi, M. Kathleen Smith, David A. Day, and James Whelan 358

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

- Expression, Activation, and Processing of the Recombinant Snake Venom Metalloproteinase, Pro-
 Atrolysin E
Ken-ichi Shimokawa, Li-Guo Jia, Xiao-Ming Wang, and Jay W. Fox 283

Structure of the Human Gene Encoding the Protein Repair L-Isoaspartyl (D-Aspartyl) O-Methyltransferase <i>Christopher G. DeVry, William Tsai, and Steven Clarke</i>	321
Competition between Plasminogen and Procathepsin B as a Probe to Demonstrate the <i>in Vitro</i> Activation of Procathepsin B by the Tissue Plasminogen Activator <i>Véronique Dalet-Fumeron, Laziz Boudjennah, and Maurice Pagano</i>	351
Ca ²⁺ - and Al ³⁺ -Induced Conformational Transitions of Amyloid Fragment H-Ile-Ile-Gly-Leu-Met-NH ₂ <i>Ilona Laczkó, Elemér Vass, Katalin Soós, József L. Varga, Sándor Száraz, Miklós Hollósi, and Botond Penke</i>	381
AUTHOR INDEX FOR VOLUME 335	403

NOTICE

The Subject Index for Volume 335 will appear in the December 15, 1996, issue as part of a cumulative index for the year 1996.

Archives of BIOCHEMISTRY AND BIOPHYSICS is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Research Reports** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Research Reports provide a mechanism for rapid publication of short but complete manuscripts on outstanding and novel research findings. They should consist of 1000 or fewer words of text and a total of six or fewer figures and tables. The first paragraph should comprise an abstract of the principal findings without abbreviations followed by the background, rationale, and conclusions of the study. Experimental methods should be reported in the table or figure legends, not in the text. Acknowledgments may be included in a footnote to the title. Omit the abstract and text subheadings, and keep literature citations to a reasonable minimum. The scientific quality of these reports should be of the highest caliber to facilitate rapid review. Authors should identify the manuscript as a Research Report and submit it directly to the Editorial Office of the journal (see below).

Accelerated status may also be given to those manuscripts that are reviewed as outstanding and that require little or no revision. At submission, authors may request accelerated publication of their manuscript. To expedite publication of such articles, authors will not receive proofs.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of BIOCHEMISTRY AND BIOPHYSICS

Editorial Office, 525 B Street, Suite 1900
San Diego, California 92101-4495

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

For nucleotide sequence data authors are encouraged to submit original nucleotide or amino acid sequence data to a databank such as GenBank or EMBL. A footnote that includes the accession number should be included on the title page. It is preferable that the sequence data be deposited either prior to submission or by the time of acceptance of the manuscript. However, a footnote can be added at the proof stage if the material is deposited after acceptance. For further information please contact the Editorial Office or GenBank or EMBL directly.

Policy regarding publication of experiments on unanes-

thetized animals conforms with the standards for use of laboratory animals established by the Institute of Laboratory Animal Resources, U.S. National Academy of Sciences. Experiments in which curariform agents are used must be justified and details of the steps taken to reduce or avoid distress to the animal must be provided, particularly with regard to electrical stimulation.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in **Archives**, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in **Archives of Biochemistry and Biophysics** represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal. Use of nonoriginal material (tables, figures, etc.) requires written permission from the copyright holder.

Form of manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8 $\frac{1}{2}$

¹ An extended Instructions to Authors is published in the January issue of **Archives of BIOCHEMISTRY AND BIOPHYSICS**. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUBMB rules and recommendations, and accepted abbreviations.

× 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations and P450 Reactions
Glycoconjugates and Oligosaccharides; Proteoglycans and Extracellular Matrices
Lipids, Lipid Mediators, and Glycolipids
Biophysical Chemistry and X-Ray Crystallography
Membrane Proteins and Transport; Intracellular Signals; Cytokines and Receptors
Enzyme Structure and Mechanisms; Cellular Regulation; Phosphorylation and Dephosphorylation
Plant Biochemistry and Molecular Biology
Protein Structure and Function; Proteases, Protein Turnover, and Posttranslational Processing
Gene Expression, Transcription, and Translation

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name, complete mailing address, and telephone and fax numbers of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *ACS Style Guide* (American Chemical Society).

Key words should be listed immediately after the abstract. The following is an example to be employed.

Key Words: thioredoxins; NADP–thioredoxin reductase; *Acetabularia mediterranea*; chloroplasts.

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (*^{a,b}*, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings, and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page ($7\frac{1}{8} \times 9$ in.; column

width, $3\frac{1}{2}$ in.) and submitted no larger than $8\frac{1}{2} \times 11$ in. Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Cover photographs. Suggestions for *cover photographs* are welcome. Submit them as slides with $8\frac{1}{2} \times 11$ -in. color or black-and-white prints to accompany specific articles. A short (one-line) legend should accompany each photograph.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of the most recent edition of *Chemical Abstracts Service Source Index*. Please note the following examples.

1. Terry, M. J., Wahleithner, J. A., and Lagarias, J. C. (1993) *Arch. Biochem. Biophys.* **306**, 1–15.
2. Birren, B., and Lai, E. (1993) *Pulsed Field Gel Electrophoresis: A Practical Guide*, Academic Press, San Diego.
3. Buchanan, S. K., and Walker, J. E. (1995) in *A Practical Guide to Membrane Protein Purification* (von Jagow, G., and Schägger, H., Eds.), pp. 125–133, Academic Press, San Diego.

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

Personal computer disks. Authors are encouraged to submit floppy disks with their articles once the manuscripts have been accepted and after all revisions have been incorporated onto the disk. Please label the disk with the type of computer used, the type of software and the version number, and the disk format. Clearly indicate the file names and contents of each file.

Manuscripts will be edited according to the style of the journal, and the proofs must be read carefully by the author. Please note that tabular material will be typeset conventionally. Every effort will be made to use the disk for the remainder of the article.

For further information, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6870; fax: (619) 699-6800).
